Does this sound like you?
Are you a search engine guru and love to find things using just a few keywords? Are you interested in helping to improve the reliability of today's AI models? If yes, then this opportunity is for you!

What we're looking for
RWS Group is looking for Search Engine Evaluators to assess and provide feedback on text, audio, image, or video search results based on specific search queries. The goal of the project is to help to understand people's intentions to better train online search engines and do so by providing ratings for the project.

Equipment you'll need
- High-speed and reliable internet connection (cable modem, DSL, etc.)
- A smartphone and a personal computer running the latest version of Google Chrome
- State-of-the-art antivirus software to protect your computer as you surf the web
- Windows or Mac OS X operating system

Job requirements
- Fluent in English to be able to follow instructions and guidelines
- Native-level fluency of German
- Ability to continually maintain quality and accuracy requirements throughout the project
- Ability to work in a fast-paced environment
- Strong understanding of popular culture in your locale
- Web-savvy and an expert in search
- Responsible, reliable, and communicative
- Only one person per household can participate in this project

Apply now
To begin, please click on the "Apply" button and sign up to join our AI community. After completing your registration, you will be asked to complete an optional assessment test. You will then start receiving email notifications on specific tasks. Additional training may be required to complete tasks.

Access more opportunities through our AI community
By becoming a Search Engine Evaluator in our AI community, you'll gain access to additional freelance, remote, part-time, or work-from-home opportunities related to training AI models. Apply today!
